Phased Deep Retrofit Project: Real-Time Measurement of Energy End-Uses and Retrofit Opportunities

Karen Fenaughty, Florida Solar Energy Center

Danny Parker, Florida Solar Energy Center

Eric Martin, Florida Solar Energy Center

SESSION SUMMARY:

This session will explore the challenges of attaining and measuring, persistent and cost effective savings from comprehensive residential retrofit programs. This panel will address the real-world practices of weatherization contractors, savings opportunities in hard to reach manufactured homes and real time measurement of energy end uses and corresponding retrofit opportunities.
