Eric Bell, Nexant

Aimee Savage, Nexant

Getting the Bead of Hardship

Benjamin Messer, Research Into Action

Jordan Folks, Research Into Action

Jane Peters, Research Into Action

Alex Dunn

Prapti Gautam, Southern California Edison

How Utilities and Regulators Can Use TOU Research Results

Andrew Lee, Pacific Gas and Electric Company

SESSION SUMMARY:

This session includes two papers and a commentary that report on and discuss initial findings from a large-scale statewide residential time-of-use pricing pilot in California. One paper reports estimated load impacts, bill impacts and attrition rates. The other reports survey-based estimates of potential economic and health impacts of the rates. The commentary, by a utility representative, will provide thoughts on how utilities and regulators can use the reported results.
