

International Energy Program Evaluation Conference

Strategic Uses of Ongoing Fast Feedback Customer Satisfaction Studies

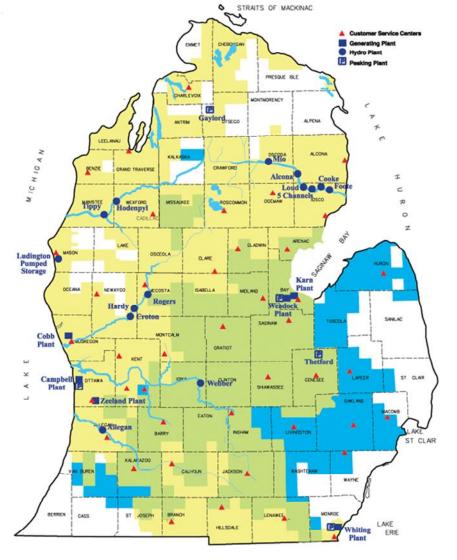

Joe Forcillo, Consumers Energy Jill Steiner, Cadmus

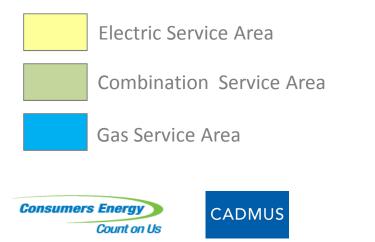

August 11, 2015

IEPEC Long Beach 2015

About Consumers Energy

- Among largest U.S. combination utilities
- Serves 6.6 million customers across Michigan's lower peninsula

IEPEC Long Beach 2015

Residential Program Expansion

- ENERGY STAR Lighting and Appliances
- HVAC and Water Heating
- Income Qualified
- Multifamily Direct Install
- Appliance Recycling

2009

Annual Savings

- 46,000 MWh
- 225,000 MCF
- Doubled number of program offerings
- 3X increase in electric savings
- 4X increase in gas savings

- Annual Savings
- 156,000 MWh
- 926,000 MCF

2014

- ENERGY STAR Lighting and Appliances
- HVAC and Water Heating
- Income Qualified: Helping Neighbors
- Multifamily Solutions
- Appliance Recycling
- Think! Energy
- Home Performance with ENERGY STAR
- Insulation and Windows
- New Home Construction
- Home Energy Reports

Rapid Customer Satisfaction Research Within Our Evaluation Framework

Data Collection Effort	Primary Mode	Scope/ Magnitude	Frequency	Other Uses
Customer Satisfaction	Online	Program and	Monthly	Identify issues
Survey		utility		for process
		satisfaction		evaluation
Process Evaluation	Telephone	Program	Annually or	Satisfaction
Surveys		awareness,	biannually	survey
		satisfaction,		calibration;
		and influence;		recruitment for
		measure		other research
		persistence		
Installation	Telephone, site	Measure	Biannually for	Customer
Verification	visits	persistence and	measures that	characteristics;
		performance	represent	equipment
			significant	saturation
			savings	
In-Depth Interviews	Focus groups	Program	As needed	
		influence;		
		design		
		preferences		

Motivations for This Approach

- Commitment to quality improvement & innovation
 - Management desire for fast feedback and early warning system
- Provide standardized measurement across programs and link to corporate customer satisfaction goals
- Accelerate problem identification, resolution and program improvements
- Maximize program effectiveness, reach and savings

Our Approach

- Maximize customers opportunity to provide feedback
 - All customers with e-mail addresses invited
 - Paper surveys distributed for direct install programs
- Standardize survey design
 - Core questions: satisfaction & likelihood to recommend
 - Small number of program-specific questions
 - Open-end question for detail and unexpected issues
- Reporting tailored to multiple audiences

Portfolio Score Card

Detailed Reporting for Program Managers

Program Satisfaction and Willingness to Recommend Satisfaction with Program Elements **Overall program** Verbatim Comments satisfaction and Identifies drivers for willingness to overall program recommend are tracked Provides additional satisfaction and over time; supports insight about the opportunities for metrics for satisfaction program experience and program enhancement with program portfolio specific issues related to and Consumers Energy program elements

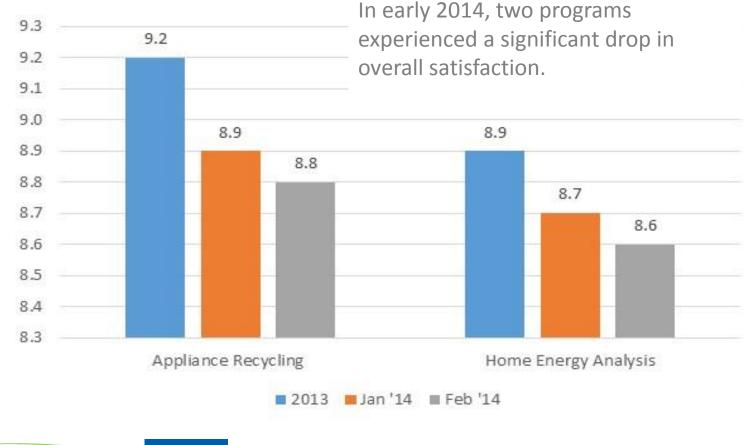

- When overall satisfaction for a program changes significantly, additional analysis done which includes:
 - Assessing correlation between program satisfaction and satisfaction with program elements
 - Additional verbatim analysis

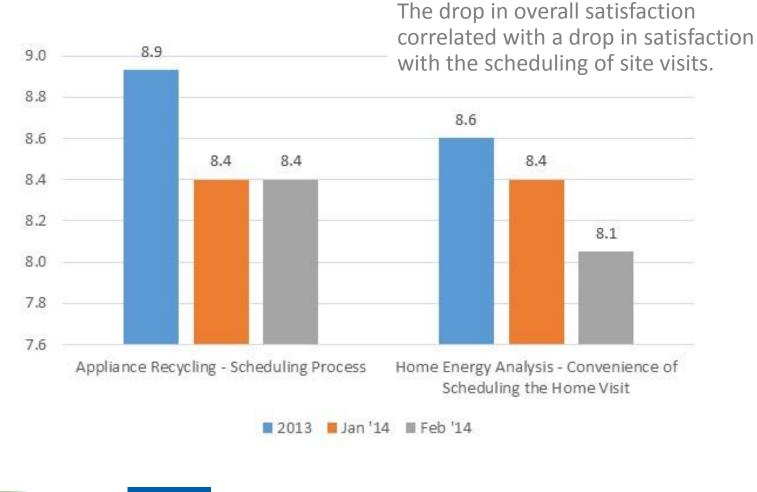

Example of Customer Satisfaction in Action

CADMUS

Satisfaction with Program Elements

Results and Resolution

 Customer comments indicated weatherrelated cancellations and long-lead times for rescheduling were issues

 Many aspects of program delivery related to scheduling

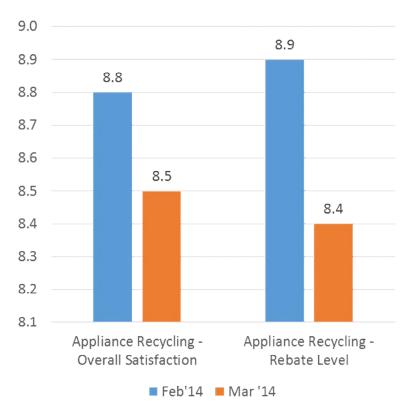

- Develop and communicate a policy for weather-related cancellations (when scheduling let customers know it is possible, provide as much notice as possible);
 prioritize cancelled customers for rescheduling
- Refined survey questions to ask about ease of scheduling, appointment time availability, schedule compliance

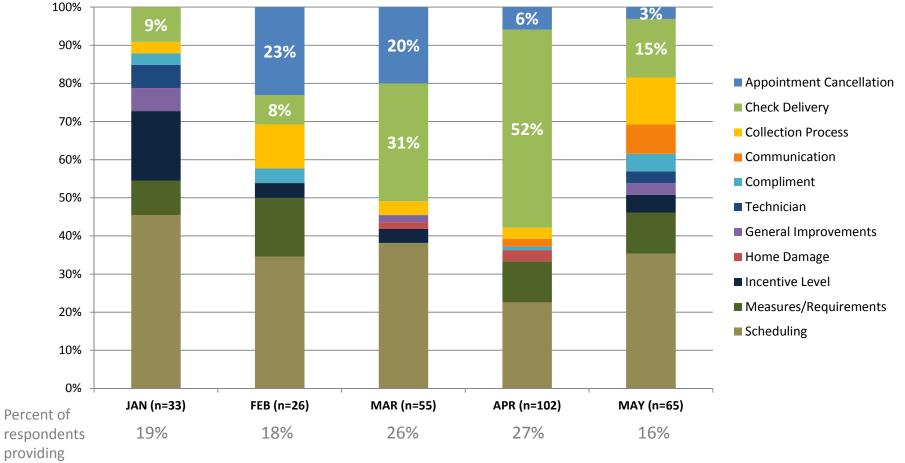

Another Example

- Satisfaction with Appliance Recycling continued to drop in March, even when weather improved
- Decline correlated with a drop in satisfaction with rebate levels
- Rebate levels had not changed—verbatim comments were reviewed to gather additional insights

Analysis of Verbatim Comments

comments

Results and Resolution

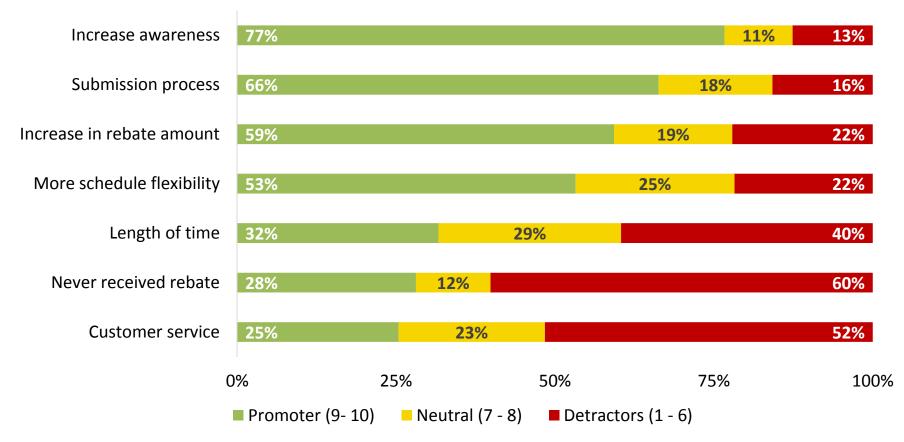

- Investigation with the program implementer found a change in staffing resulted in delays with check delivery
- Increased frequency of topics reported in verbatim comments indicated the need for measurement in additional program areas

- Implementer further documented the check delivery process to ensure no further interruptions due to staff changes
- Evaluation team added survey questions on program elements that had significant impacts on customer satisfaction

Likelihood to Recommend the Program by Comment Type

Analysis of all verbatim comments from 2014.

IEPEC Long Beach 2015

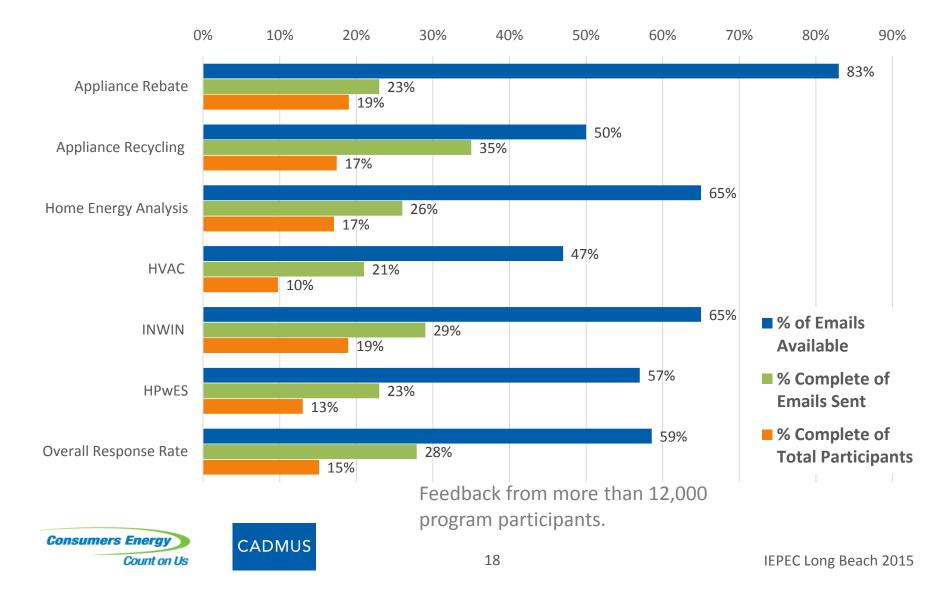

Benefits of Rapid, Frequent Research

- Increases frequency of dialogue between program managers and evaluation staff
- Improves evaluator understanding of program
- Improves program managers understanding of operations and their customers
- Research provides input for managing relationships throughout the program delivery team
 - Implementers, analysts and technicians, trade allies
- Program satisfaction supports corporate goals
- Broader representation of customers than allowed with most evaluation budgets; higher confidence and precision

17

Survey Response Rates

Keys to Success

- Minimize customer burden with:
 - Very short surveys (~7 questions) are critical to high response rate
 - Meet the customer where they are; high proportion of customers will complete the survey on mobile devices if supported
- Balancing timeliness, comprehensiveness, and use of evaluation resources
 - Dashboard reporting and quarterly insights
- Implementation contractor engagement
- Timely reporting
- Senior management support and interest
 - Regular review and tracking of research-driven program improvements
