Formatting Instructions – One- or Two-page Poster Summary

Please use this guide as your primary references in completing your poster summary. Your summary should be limited to one page, and should be in text format only with no tables or figures. Use the Verdana as the base font (10pt for body text). Do not add page numbers anywhere.

Your Poster's Title

Begin your title at the top margin of your paper, type no more than three lines, centering each line, and using a 14pt size font and bold and initial caps. Allow one blank line space under the last line of your title. (See example at top of this page.)

Author/Byline Information

Use one line only for each contributing author. Use a 12pt Calibri font, in italics, as shown above. Begin with first name, middle initial, last name, name of firm/organization/institution. Try to abbreviate affiliations whenever possible. Do NOT include street address, zip codes, additional titles, degrees, departments, etc. Two blank lines should follow the last author line before your first heading.

Headings—Level A Example

Level A headings should be flush left to the column. One blank line should appear before and after each new Level A heading in your paper. Use a 11pt Calibri font, bold, with initial capitals.

Subheading, Level B Example

Level B subheadings should be positioned flush left to the column. One blank line should appear before and after each new subheading. Use a 11pt Calibri font, bold, with initial capitals.

Subheading, Level C. This is an example of a third level heading — no carriage return after the heading.

Body of One-Page Poster Summary

Indent the first line of each new paragraph (0.5"). Use full justification, letting the text wrap — no hard returns except when starting a new paragraph. Use a 10pt Verdana font. Do NOT double-space between paragraphs. However, double-space before starting a new heading or subheading.
