

**Name:** Muhammad Kamil Qaddus

**Affiliation:** Centre for Energy and Environmental Policy, University of Delaware

**Expected Graduation:** Masters, 5/30/17

**Field of Study:** Energy Efficiency Program Evaluation

My graduate thesis includes but not limited to:

- Developed an innovative Energy Efficiency Financing Strategy for Public Sector buildings with Inclusive financing for effective project implementation.
- Established linkage of a M&V system with project financing of Energy Efficiency projects for effective project implementation.

The topic provides skeleton to the equity based market economy and quantifies the inherent as well as intersecting financial and engineering risk in Energy Efficiency buildings sector and in turn presenting in the form of incentive to customers.

Outcome of my thesis includes projecting verified savings for a particular set of building type, measure type (deep retrofit/shallow retrofit), capital size, etc. Therefore this conference will help me in connecting with potential data resources and collaboration partners.
